

Yuvan Shankar Raja M

Computer Science Engineering Student · CARE College of Engineering, Trichy

Ph No: +91 87782 99015 | Mail : yuvanshankarraja.m@care.ac.in | Location: Trichy, Tamil Nadu

OBJECTIVE

Motivated and detail-oriented Computer Science Engineering student at CARE College of Engineering, Trichy, with a strong foundation in web development, UI/UX design, Python programming, and AI-powered application development. Passionate about building accessible, user-centric digital solutions that address real-world challenges. Demonstrated ability to work in team environments through hackathon participations, project expos, and collaborative development. Seeking an entry-level opportunity to contribute meaningfully to a growth-driven organization while continuously expanding technical expertise and industry knowledge.

EDUCATION

B.E. Computer Science Engineering <i>CARE College of Engineering, Trichy (Anna University)</i>	2024 – 2028
12th Grade – Tamil Nadu State Board <i>Ponniah Higher Secondary School, Trichy</i>	2023 – 2024
10th Grade – Tamil Nadu State Board <i>Ponniah Higher Secondary School, Trichy</i>	2021 – 2022

TECHNICAL SKILLS

Languages & Web: Python, Java (Beginner), HTML5, CSS3, JavaScript
Design & Tools: UI/UX Design, Canva, Figma (Basic)
Soft Skills: Communication, Teamwork, Problem-Solving, Presentation

PROJECTS

Job-Hub — <i>AI-Powered Job Assistant Platform</i>	2025
- Built an AI-powered job assistant platform designed to help illiterate and semi-literate users find suitable employment through voice and visual interfaces. - Integrated natural language processing to interpret user queries and match them with relevant job listings in real time. - Focused on accessibility-first design, enabling users with low digital literacy to navigate the platform independently.	
Invento — <i>AI-Powered Inventory Management System</i>	2025
- Developed an AI-powered inventory management system to automate stock tracking, demand forecasting, and restocking alerts. - Built a dashboard with real-time data visualization for inventory levels, sales trends, and low-stock notifications. - Implemented AI-based insights to reduce overstock and stockout scenarios, improving overall supply chain efficiency.	

WORKSHOPS & ACTIVITIES

Smart India Hackathon (SIH) — <i>Attendance Management System for Punjab Govt</i>	2025
- Designed and developed a smart attendance system to automate student attendance tracking using digital solutions for the Punjab Government. - Built a user-friendly mobile/web application using React and Firebase to reduce manual errors and improve efficiency in attendance management. - Implemented features including real-time attendance marking, cloud data storage, and automated report generation; presented solution to an evaluator panel.	
Workshop & Project Expo — <i>CARE College of Engineering</i>	2026
- Presented an original project at the college Project Expo, explaining design decisions and real-world applicability to faculty and peers. - Participated in technical workshops to enhance practical knowledge; strengthened problem-solving, communication, and live demonstration skills.
